LDMS USER GROUP MEETING

Sep 8, 2025

Agenda

- Update on v4.5.1 release
- Q&A

Update on v4.5.1 Release

- One release blocker - Issue 1813
 - Race condition causing assertion failures and memory corruption when LDMS daemon processes ldms_ls connections during configuration loading startup
 - PR #1919 applied missing thread locking to address identified race conditions in Zap and ovis_event libraries
 - Patch resolved the issue in small testing environments, but original reporter's setup still experiences assertion failures

Q&A

-

Thank you!
