

LDMS USER GROUP MEETING

Jan 26, 2026

Agenda

- V4.5.2 Status
- Monitoring in Multi-Tenant Environments with LDMS
- Q&A

V4.5.2 - Status

- We are testing b4.5 with additional patches (planned to be included to v4.5.2)

The screenshot shows a list of six GitHub pull requests (PR #2140, PR #2138, PR #2136, PR #2134, PR #2131, and PR #2129) that have been merged into the b4.5 branch. Each PR is accompanied by a green checkmark icon and a 'b4.5' badge. The PR descriptions include: 'Add (at log level DEBUG) yaml input and builder tree log output', 'fix check for updaters section absence in parser_util.py', 'add context clues for admins to exception/error from parser_util.py', 'update ldmsd_yaml_parser to use logging and support short options', 'share auth/listen targets across write_[advertisers, listeners, producers, samplers, aggregators]', and 'Sort list of expanded hostnames in yaml parser'. The PRs were opened last week by baalian and merged into v4.5.2.

- >Add (at log level DEBUG) yaml input and builder tree log output ✓ b4.5
#2140 opened last week by baalian ➔ v4.5.2
- fix check for updaters section absence in parser_util.py ✓ b4.5
#2138 opened last week by baalian ➔ v4.5.2
- add context clues for admins to exception/error from parser_util.py ✓ b4.5
#2136 opened last week by baalian ➔ v4.5.2
- update ldmsd_yaml_parser to use logging and support short options ✓ b4.5
#2134 opened last week by baalian ➔ v4.5.2
- share auth/listen targets across write_[advertisers, listeners, producers, samplers, aggregators] ✓ b4.5
#2131 opened last week by baalian ➔ v4.5.2
- Sort list of expanded hostnames in yaml parser ✓ b4.5
#2129 opened 2 weeks ago by nick-enoent ➔ v4.5.2

Monitoring in Multi-Tenant Environments with LDMS

- We are going to another slide deck
