# LDMS USER GROUP MEETING

June 29, 2026

©2026 Open Grid Computing, Inc.

# Agenda

- LDMS Regression Test
- Regression Test Results
- Q&A

# LDMS Regression Test Infrastructure

# LDMS Regression Test

- GitHub: ovis-hpc/ldms-test
- Covers unit, functional, and integration tests
- Multi-daemon Docker container clusters per test
- Test framework: TADA — a Python test assertion framework; results can optionally be reported to a tadad server for centralized storage and tracking across runs

# Regression Infrastructure Migration

- Moving from dedicated test bed to OCI (Docker container) environment
- Slurm 23+ requires systemd/dbus — not yet available in the interim test environment
- Slurm integration for v4.5 releases is covered through manual testing alongside scalability tests

# ‘main’ Branch Results

# ‘main’ Branch: Result 44 of 56 Pass

- Image: ldms-dev-ubuntu-2404
- Core functionality verified
  - Aggregation
  - Authentication
  - Decomposition
  - Peer daemon advertisement
- Full lifecycle coverage
  - Updater
  - Producer
  - Storage policy
  - Sampler & storage plugin life cycle
- 12 failures — all with identified causes

# 12 Failures Breakdown

- Known bugs — 4 tests (fixes in progress, PRs pending review)
- Test scripts need updating — 6 tests
- Under investigation — 2 tests

# ‘b4.5’ Branch Results

# b4.5 branch: Result 50 of 56 Pass

- Core functionality verified
  - Aggregation
  - Authentication
  - Decomposition
  - Peer daemon advertisement
- Full lifecycle coverage
  - Updater
  - Producer
  - Storage policy
  - Sampler & storage plugin life cycle
- 6 failures — all with identified causes

# 6 Failures Breakdown

- Test scripts need updating — 2 tests
  - Timeout waiting for data
  - Outdated image reference in script
- Under investigation — 4 tests

# Result Comparison & Next Steps

# main vs b4.5: Comparison

- Pass on both — 41 tests
- Pass on b4.5, fail on main — 9 tests
- Fail on both — 3 tests
- Pass on main, fail on b4.5 — 3 tests

# Next Steps

- Merge pending PRs to main (#2336, #2337, #2338, #2339)
  - Bugs addressed by these PRs are not present or already fixed in b4.5
- Update test scripts with known root causes for both branches
- Investigate failed tests with unidentified root causes for both branches
- Complete OCI environment setup

# Q & A

- 

# Thank you!
