LDMS USER GROUP MEETING

July 13, 2026

©2026 Open Grid Computing, Inc.

Agenda

- Regression Test Update
- v4.6.1
- v4.5.3
- ldmsd's IP Family Control Proposal
- Q&A

Regression Test Update

- Continuing the test-script update work shared last meeting (main and b4.5)
- No new bugs found since then
- Remaining work is aligning scripts to recent ldmsd behavior changes

V4.6.1 and V4.5.3

- Status: in testing phase
- Actively working toward release

V4.5.3: Changes Since v4.5.2

Networking Reliability

- Improved address-family selection so servers and clients connect correctly across IPv4-only, IPv6-only, and mixed environments
- Added automated tests covering IPv4-only and mixed IPv4/IPv6 setups for every future change

Python Environment Support

- Improved memory cleanup for LDMS Set objects on the Python side, ensuring resources release reliably
- Extended build support to newer Python/Cython versions while keeping compatibility with older ones

V4.5.3: Changes Since v4.5.2 (cont)

Slurm_notifier Enhancement

- Extended the slurm_notifier with a workflow-tracking ID

Test Example Cleanup

- Clarified terminology in test examples (msg_channel → msg_tag)

Other

- Explicit type correctness in the rail InfiniBand connection message struct
- Consolidated validation checks in the ovis_map collection library

ldmsd's IP Family Control Proposal

IP Address Family Proposal

ldmsd will stop guessing which IP family to use

- Today:
  - In ldmsd, ai_family is set to 0 — no family filter, so getaddrinfo() resolves whatever matches, and an ipv6-formatted address naturally resolves to ipv6
  - Many sites disable ipv6 entirely
- New default:
  - ipv4-only, unless a user explicitly opts in

How to Opt Into IPv6

Command line (ldmsd, ldms_ls, ldmsd_controller)

- -6 — force ipv6 (hints.ai_family=AF_INET6)
- -U — auto-detect (today's behavior)

Config command (ldmsd)

- net_family type=[4|6|auto]

No flag, no command → ipv4-only (hints.ai_family=AF_INET)

Open Question: Does ipv4-Default be included in v4.5.3 and v4.6.1?

Q & A

-

Thank you!
